PRIMARY SCHOOL

Progression of skills in Maths: Measurement

| Skills: | Year 1 | Year 2 | Year 3 | Year 4 | Year 5 | Year 6 |
|----------------|---|---|--|---|--|---|
| Using measures | compare, describe and solve practical problems for: ➤ lengths and heights ➤ mass/weight ➤ capacity and volume ➤ time measure and begin to record the following: ➤ lengths and heights ➤ mass/weight ➤ capacity and volume ➤ time (hours, minutes, seconds) | choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels compare and order lengths, mass, volume/capacity and record the results using >, < and = | measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (I/mI) | Convert between different units of measure [for example, kilometre to metre; hour to minute] estimate, compare and calculate different measures | convert between different units of metric measure understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling | solve problems involving the calculation and conversion of units of measure, using decimal notation up to 3 d.p. where appropriate use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to 3 d.p. convert between miles and kilometres |
| Money | recognise and know the value of different denominations of coins and notes | recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value find different combinations of coins that equal the same amounts of money | add and subtract amounts of money to give change, using both £ and p in practical contexts | estimate, compare and calculate different measures, including money in pounds and pence | use all four operations to solve problems involving measure [for example, money] | |

| Time | sequence events in chronological order using language [for | solve simple problems in a practical context involving addition and subtraction of money of the same unit, including g compare and sequence intervals of time | tell and write the time from an analogue clock, including using | read, write and convert time between analogue and digital | solve problems involving converting between units of time | use, read, write and convert between standard units, |
|----------------------------|---|--|--|---|--|---|
| | example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening] recognise and use language relating to dates, including days of the week, weeks, months and years tell the time to the hour and half past the hour and draw the hands on a clock face to show these times | tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times know the number of minutes in an hour and the number of hours in a day | Roman numerals from I to XII, and 12- hour and 24-hour clocks estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight know the number of seconds in a minute and the number of days in each month, year and leap year compare durations of events [for example to calculate the time taken by particular events or tasks] | 12- and 24-hour clocks solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days | | converting measurements of time from a smaller unit of measure to a larger unit, and vice versa |
| Perimeter, Area, Volume | | | measure the perimeter of simple 2-D shapes | measure and calculate the perimeter of a rectilinear figure | measure and calculate the perimeter of composite rectilinear | recognise that shapes with the same areas can have different |

| | (including squares) in | shapes in centimetres | perimeters and vice |
|--|------------------------|------------------------|-----------------------|
| | centimetres and | and metres | l · |
| | | and medes | versa |
| | metres | 1 | |
| | | calculate and compare | recognise when it is |
| | find the area of | the area of rectangles | possible to use |
| | rectilinear shapes by | (including squares) | formulae for area and |
| | counting squares | and including using | volume of shapes |
| | | standard units, square | |
| | | centimetres (cm2) | calculate the area of |
| | | and square metres | parallelograms and |
| | | (m2) and estimate | triangles |
| | | the area of irregular | |
| | | shapes | calculate, estimate |
| | | Shapes | and compare volume |
| | | actimate valume [for | of cubes and cuboids |
| | | estimate volume [for | |
| | | example, using blocks | using standard units, |
| | | to build cuboids] and | including cubic |
| | | capacity [for example, | centimetres (cm3) |
| | | using water] | and cubic metres (m3 |
| | | |), and extending to |
| | | | other units |
